

User Manual

Nexyzen plugin for Odoo 19 — Invoice offsetting

Automatically send unpaid invoices to Nexyzen to offset them without bank costs.

Nexyzen is a service by **Camera di Compensazione** · www.nexyzen.com

1. What it is and what it does

Nexyzen is the **Camera di Compensazione** platform that offsets the receivables you still have to collect against the invoices you have not paid yet, **without bank costs**. This plugin connects Odoo to Nexyzen and periodically and automatically sends the **unpaid** invoices:

- **customer invoices** (active) — your receivables;
- **vendor bills** (passive) — your payables.

Invoices are re-proposed on every cycle until they are settled: you never have to remember to resend them.

The plugin is **multilingual**: English, Italian, German, Slovenian, French and Spanish (see §10). The interface follows the Odoo user's language automatically.

2. Where to find it

After installation the **Nexyzen** app appears in Odoo's main menu, with two entries: **Invoices to offset** (the working list) and **Settings**.

Nexyzen Invoices to offset Compensations to accept Credit-assignment letters Settings							My Company	
New Invoices to offset		To send Search...					1-3 / 3	
☐ Invoice	Type	Customer/Vendor	Number	Due date	Amount to off...	Status	Sent on	Result
☐ INV/2026/00005	Customer invoice (active)	Rossi S.r.l.	INV/2026/00005	Jul 19	\$ 4,200.00	To send		
☐ INV/2026/00006	Customer invoice (active)	Rossi S.r.l.	INV/2026/00006	Jul 4	\$ 1,850.50	To send		
☐ BILL/2026/07/0002 (BF-2026-114)	Vendor bill (passive)	Bianchi Forniture S.p.A.	BF-2026-114	Jul 15	\$ 3,100.00	To send		

The Nexyzen app and the «Invoices to offset» list.

For each selected invoice the list shows: type (customer/vendor), partner, number, due date, **amount to offset** and status (*To send*, *Sent*, *Error*).

3. Settings

Open **Nexyzen** → **Settings**. The configuration can always be changed. At the top there are two buttons: **Test connection** and **Select and send now** (runs the cycle immediately, useful for a test).

3.1 Selection criteria

Define **which** invoices to send.

Settings — Sending mode and days.

- **Sending mode:**
 - **Automatic:** selected invoices are sent immediately;
 - **With manual approval:** a list is prepared for the user to review and confirm before sending (see §5).
- **Sending days:** the weekdays on which the automatic cycle runs (Monday to Saturday; Sunday is not available).

3.3 Notifications

Selection criteria Sending Notifications

Notification email ?

Notification mobile ?

Settings — Notifications.

- **Notification email** and **mobile** (optional): where Nexyzen sends confirmations and alerts about your sendings and offsets.

The connection to Nexyzen is **pre-configured**: no technical setup is required. Press **Test connection** at any time to check that the link works.

4. How the cycle works

Every day a scheduled Odoo action («Nexyzen: daily invoice sending») checks whether the current day is enabled among the **sending days**. If so it:

1. selects the unpaid invoices matching the criteria;
2. in **Automatic** mode sends them to Nexyzen straight away;
3. in **Manual approval** mode prepares the list and waits for the user;
4. records the result of each send (*Sent* or *Error*).

You can also run the cycle at any time with **Select and send now**.

5. Manual approval and editing the list

In **Manual approval** mode the selected invoices appear under **Invoices to offset** with status *To send*. The list is **editable**:

- you can correct the **Amount to offset** (pre-filled with the residual, but editable: useful for partial offsetting);
- you can **remove** the rows you do not want to send;
- you select the rows and press **Send to Nexyzen**.

☐	Invoice	Type	Customer/Vendor	Number	Due date	Amount to off...	Status	Sent on	Result	
☐	INV/2026/00005	Customer invoice (active)	Rossi S.r.l.	INV/2026/00005	Jul 19	\$ 4,200.00	To send			
☐	INV/2026/00006	Customer invoice (active)	Rossi S.r.l.	INV/2026/00006	Jul 4	\$ 1,850.50	To send			
☐	BILL/2026/07/0002 (BF-2026-114)	Vendor bill (passive)	Bianchi Forniture S.p.A.	BF-2026-114	Jul 15	\$ 3,100.00	To send			

The list is editable: amount editable row by row.

When finished, each row shows the updated status and the outcome message in the **Result** column.

6. Re-proposed until paid

An unpaid invoice is **re-proposed on every cycle**, even if already sent before: it stops appearing only when it is marked **paid** in Odoo. Nexyzen recognises resends of the same invoice (same number, date and creditor) and does not create duplicates.

7. Statuses and results

Status	Meaning
To send	Invoice selected, waiting to be sent (or approved).
Sent	Nexyzen received the invoice correctly.
Error	Sending failed; the reason is shown in the Result column (e.g. missing VAT, connection failed).

8. Reviewing and accepting proposed compensations

When the Nexyzen clearing engine finds a cycle of receivables and payables that offset each other across several companies, it proposes a **compensation** to each participant. Open **Nexyzen** → **Compensations to accept**: the plugin retrieves the pending proposals and lists them.

Complete the registry data below before accepting this proposal.

Compensation ID 101
Cycle ID 555
Amount \$ 2,500.00

RECEIVABLE CEDED (TOWARDS)

Receivable towards (VAT) IT07643520567
Receivable towards (name) Rossi S.r.l.

PAYABLE OFFSET (TOWARDS)

Payable towards (VAT) IT00799960158
Payable towards (name) Bianchi Forniture S.p.A.

Role	Number	Date	Total amount	Open amount
Receivable ceded	FT 2026/041	2026-05-18	\$ 4,200.00	\$ 4,200.00
Payable offset	BF-2026-114	2026-05-10	\$ 3,100.00	\$ 2,500.00

LEGAL BASIS

A proposed compensation, with the registry fields still to complete.

Each proposal shows the offset **amount**, the **receivable ceded** (to whom, with which invoices) and the **payable offset** (to whom, with which invoices), plus the **legal basis** of the operation.

If Nexyzen does not yet have the assignor's full registry data, the proposal lists the **missing fields** (e.g. legal representative details): fill them in directly on the form before pressing **Accept**. The **Accept** button blocks the action and lists the fields still missing until they are all filled in.

Once **every** participant of the cycle has accepted, the compensation is **complete** and Nexyzen issues the credit-assignment letters (see §9).

9. Credit-assignment letters

Once a cycle is complete, Nexyzen deposits a **credit-assignment letter** for each participant: the document that formalises the completed compensation. Open **Nexyzen** → **Credit-assignment letters** to retrieve them.

[INFO] Lettera di cessione credito n.101 / Credit assignment letter no.101

Lettera di cessione del credito

La presente comunica che, in data odierna, il ciclo di compensazione n. 555 si è concluso con l'accettazione di tutti i partecipanti.

La Vostra azienda cede un credito di **EUR 2.500,00** maturato verso **Rossi S.r.l.** a copertura del debito residuo verso **Bianchi Forniture S.p.A.** per pari importo, ai sensi degli artt. 1252 e ss. del Codice Civile.

La compensazione si intende perfezionata senza movimentazioni bancarie né costi aggiuntivi per le parti coinvolte.

Nexyzen è un servizio di Camera di Compensazione - www.nexyzen.com

A received credit-assignment letter.

Each letter shows the subject, issue date and retrieval date, with the full text of the communication. Use **Print / Download PDF** to get a copy to archive or share.

10. Multilingual

The interface is available in **English, Italian, German, Slovenian, French and Spanish** and follows the language set for the Odoo user (Preferences → Language). Below, the same screens in other languages.

11. Notes for going live

- The connection to Nexyzen is **pre-configured**: no technical setup is needed.
- Make sure the company and the customers/vendors have their **VAT number** filled in: it is the essential data for offsetting.
- Choose the **sending days** and the **mode** (automatic or manual approval) that best fit your operations.
